# Thank you for purchasing Nokia FastMile Gateway

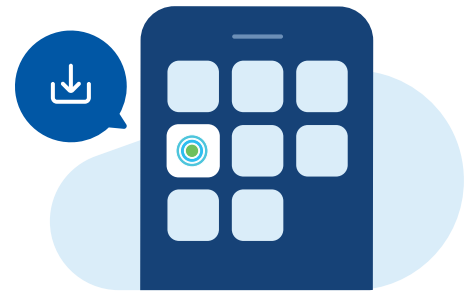

In the box you will find:

1x Gateway
1x Power supply
1x Quick Start Guide
1x Warranty and Safety information

1. Download the mobile app

If it is the first time you power your FastMile Gateway, please download the **Nokia WiFi App** to your phone or tablet to configure your device.

Please create your account and scan the device QR code as described in next step.
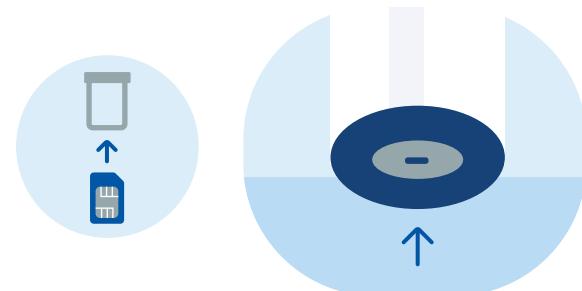

Download on the **App Store**

GET IT ON **Google Play**

2. Scan the QR code

Use the in-app QR code scanner to read the QR code located either on the top of the giftbox or on the bottom of the gateway.

The App guides you through all the steps necessary to setup your gateway. Alternatively, you can setup your device by performing the following steps.
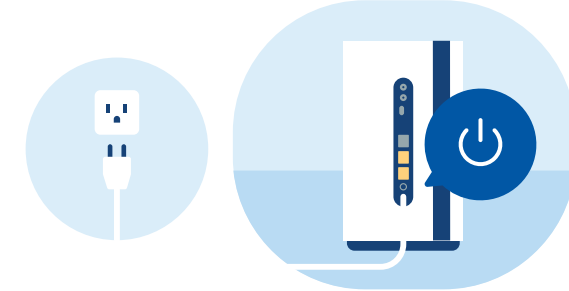

3. Insert SIM card

Unbox and place your FastMile Gateway in an area with few obstructions, ideally near a window. Make sure there is a nearby power outlet.

Remove SIM tray and place the SIM card securely in the tray and reinsert it into the gateway.

4. Power on

Plug in the power adaptor and then connect it to your gateway. Push the on/off button, the LEDs on the top of the gateway will turn on.

Your Nokia Gateway will start to search for the best connection.
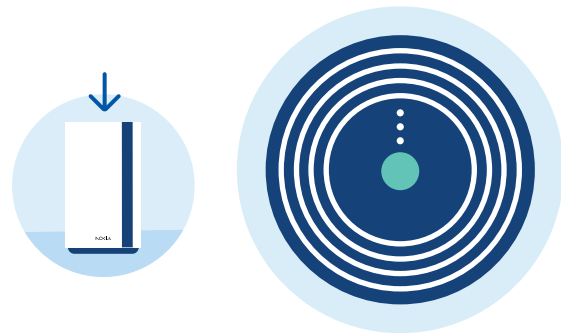

5. Search best connection

The gateway will boot up and begin searching for a signal. The status LED in the middle will start blinking.

The signal search will take few minutes.

6. Check status lights

When the status LED is green, you are connected. The next three LEDs are indicating the signal strength.

When all three are on, there is a very good signal. Two LEDs means good, and one LED means weak signal.

7. Relocate if signal is poor

Reposition the gateway if the signal strength is weak.

Power off the gateway and try to move it to a better location, e.g. closer to a window, a different room in your home or a higher position.
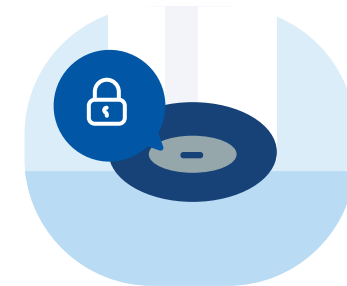

8. You are almost there...

Once you've got a good signal, it's recommended that you do not reposition the gateway.

9. Connect to Wi-Fi

SSID
example-ID

Wi-Fi key
XXXXXXXXX

Connect devices to your gateway using the SSID {Wi-Fi Name} and Wi-Fi key printed on the bottom of the device.

It is recommended to change the WiFi password for your security.

Enjoy your Home Broadband

To manage your Wi-Fi network, use the mobile app or visit https://192.168.1.1 or http://192.168.1.1 in your browser.
